AF-10 ANTIFOAM/DEFOAMER

AF-10 Antifoam/Defoamer is a stable water based silicone defoamer for control of foam in aqueous systems. **AF-10** is non-toxic and its specifically developed functional groups aid in quick dispersibility, slight insolubility and stability.

PROPERTIES:

Color and Form: Opaque, white to off-white liquid

Flammability: Non-flammable

Specific Gravity @ 80°F: 0.96 to 1.01

Density: 8.2 lbs/gallon

Viscosity (80°F, Brookfield RVT
#3 spindle, 50 rpm; cP 1700

pH 7.5 to 8.0

Dosage is application specific and **AF-10** may be fed through regular application equipment.

AF-10 should be stored above 40°F, but not to exceed 120°F. During prolonged storage, the product may require periodic mixing or recirculation.

See Material Safety Data Sheet for further information.
